

New Dometic Holding Tank Systems

FIVE POPULAR SIZES, PRE-ASSEMBLED FOR EASY INSTALLATION

BIG PRAIRIE, OHIO, USA – OCT 2008 – To help pleasure boat owners comply with expanding “clean water” requirements, Dometic introduces the new HTS-L series of pre-assembled holding tank systems.

Available in capacities of 11, 16, 23, 29, and 36 gallons, Dometic's five new holding tanks are pre-plumbed with inlet and discharge fittings, a vent fitting, inspection port and pressure relief valve. Each “plug ‘n play”-style tank is pressure-tested and ready to install – just bolt it down, fasten the hoses, and hit the water.

Dometic preassembled holding tank systems

High-strength polyethylene tanks feature a heavy-duty wall thickness of 1/4-inch to maintain integrity even under high pressure, and to avoid permeation of tank wall with waste odour. Built-in mounting “feet” allow fast, secure bolting to the hull without restraining straps. Top-mounted inlet, discharge and vent fittings rotate to accommodate virtually any plumbing layout. Specially designed discharge fittings also assure clog-free pump-out and minimal residual after pump-out is complete. Dometic tanks are supported with a five-year warranty against cracking or leaking in normal use. Also included with each tank are an extra inlet fitting, plug, sealing grommet and hose lubricant for easy hose attachment.

This versatile Dometic holding tank system selection will help boats up to 80 feet long to meet local “no-discharge” requirements. Inlet and discharge fittings accommodate 1.5-inch ID sanitation hose, but can be adapted to other plumbing system dimensions.

(more)

Dometic Sanitation, and its predecessor companies, have sold over 250,000 holding tank systems for boats since the early 1970s when boats were required to stop discharging sewage into the Great Lakes of the USA. Dometic holding tanks provide trouble-free service during the life of the boat. Each component of the Dometic holding tank system is proven in thousands of installations in meeting that goal.

Dometic holding tank systems are marketed and supported through a worldwide network of marine sales companies, distributors and dealers.

Dometic Sanitation, formerly SeaLand Technology, is the leading supplier of onboard sewage management systems for premium yachts worldwide. Dometic is the originator of the VacuFlush toilet system and specializes in custom-designed holding tank systems.

Dometic Group is a customer-driven, world-leading provider of leisure products for the caravan, motorhome, automotive, truck and marine markets. We supply the industry and aftermarket with a complete range of air conditioners, refrigerators, awnings, cookers, sanitation systems, lighting, mobile power equipment, comfort and safety solutions, windows, doors and other equipment that make leisure life more comfortable away from home.

Dometic Group supplies a wide range of workshop equipment for service and maintenance of built-in air conditioning. Dometic Group also provides specially designed refrigerators for hotel rooms and offices, for transport and storage of medical products, and for storing wine.

Our products are sold in almost 100 countries and are produced mainly in wholly-owned production facilities around the world. The number of employees is 6,000.
